Betting rules for BETBALLS game

Bet Balls is RNG (random number generator) game, where the outcome of the bets is generated with random selection.Event is displayed with BINGO animation

The principle of the draw:

- There are 48 numbers in virtual drum,marked with 8 colors(red,yellow,black,orange,violet,pink,blue and green).
  In every round 35 out of 48 numbers are drawn,except the bonus round ,where 40 out of 48 numbers are drawn.Time between drawings is configurable
- Player can choose 6,7,8,9,or 10 numbers which he wants to play.Minimum number of bets is 6,the other number off bets is configurable ,based on customer wishes.Minimum and maximum payin is also configurable, as well as max payout
- Player can place bets on just one drawning,or next two,three,or four drawnings.
- The player wins if all numbers bet by the player are drawn. The value of the winnings depends on the serial number of the last correctly number bet by the player. With each serial number of the number drawn, there is a payout scheme by which the player's deposit is multiplied in case of victory.
- There are the following types of bets:
  - bet on a single option (6 numbers).
  - cumulative bet several variants (of 6 numbers each)
  - bet system (combinations)

Bet System

Betballs betting system allows you to bet up to 10 numbers on a ticket, which means there can be up to 210 combinations on a ticket.

The player can bet on:

- Minimum 6 numbers = 1 combination 6/6
- 7 numbers = 7 combinations 6/7
- 8 numbers = 28 combinations 6/8
- 9 numbers = 84 combinations 6/9
- 10 numbers = 210 combinations 6/10

The win is calculated according to the chosen system, namely the serial number of the last 2/3/4/5 numbers drawn from the numbers bet by the player. With each serial number of the number drawn, there is a gain coefficient in the payout table by which the number of combinations is multiplied.

Example:

On one ticket, 8 numbers are chosen for round no. 906185: 1, 3, 28, 9, 35, 25, 32, 4
Stake 2 RON
Total number of combinations = 28 (representing system 6/8)
Stake / combination = 0.07 ron

Number 32 was drawn at position 11
The player has so far, a combination of 6 numbers (3, 28, 9, 35, 25, 32) at odds 500 (11 represents the serial number with the winning coefficient 500).
So far, his winnings are 500 x 0.07 RON (stake / combination) = 35 ron
Number 4 was drawn at position 15
The player has 6 more winning combinations at odds 100
6 combinations x 100 x 0.07 = 42 RON
Number 1 was drawn at position 17
The player has the last 21 winning combinations at odds 80
21 combinations x 80 x0.07 = 117.60 RON
The total gain is 35 + 42 + 117.60 = 194.60 RON

The Player's winnings are 93.00%.

Payout table

ID Series	Win %	ID Series	Win %	ID Series	Win %	ID Series	Win %
6	20000	15	100	24	20	33	3
7	10000	16	90	25	15	34	2
8	5000	17	80	26	10	35	1
9	2500	18	70	27	9	36	1
10	1000	19	60	28	8	37	1
11	500	20	50	29	7	38	1
12	300	21	40	30	6	39	1
13	200	22	30	31	5	40	1
14	150	23	25	32	4		

Aditional games

First color bet- Player picks color of first ball with specific odd determined for that bet(This odd is configurable ,but it is almost every time 7,00).Color of first ball can be red,yellow,black,orange,violet,pink,blue and green

First ball even – Player picks that the first drawn ball will be even number,with the odd determined for that bet (1,90)

Firs ball odd - Player picks that the first drawn ball will be odd number,with the odd determined for that bet (1,90)

First ball over 24,5 - Player picks that the first drawn ball will over 24,5,with the odd determined for that bet (1,90)

First ball under 24,5 - Player picks that the first drawn ball will be under 24,5,with the odd determined for that bet (1,90)

Sum of first 5 balls over 122,5- Player picks that the sum of first 5 balls will be over 122,5, with the odd determined for that bet (1,90)

Sum of first 5 balls under 122,5 - Player picks that the sum of first 5 balls will be over 122,5, with the odd determined for that bet (1,90)

More even balls – Player picks that there will be more even than odd numbers of the total number of drawn balls, with the odd determined for that bet (1,90)

More odd balls – Player picks that there will be more odd than even numbers of the total number of drawn balls, with the odd determined for that bet (1,90)

Double win – Before the drawing ,two random positions are determined for the double win marked with star(From the sixth dwan number to last drawn number)

Bonus round - In addition to the standard 35 numbers,5 more extra numbers will be drawn,total 40 numbers.

Color bonus – Player wins this bonus if he plays 6 numbers from the same color and all numbers were drawn among the first „n“ numbers drawn in that round (This is configurable,customer can choose which drawn number can be the last number for color bonus win).This bonus is increasing also depending on percentage set in configuration from every played ticket.

No match bonus - If the player doesn`t have any drawn number from all bets he played,he wins this bonus. This bonus is increasing also depending on percentage set in configuration from every played ticket.

Betballs Mistery jackpot bonus – The software program used by the organizer will randomly award winning tickets to the BetBalls Mystery Prize nationwide based on the selection made by the software program.

Prize for any match

The player wins a Prize for any match if during all draws, no number bet by him/her is drawn. If more than one player meets the conditions for winning the prize, the amount of the prize will be shared equally between them.
